#### ISSUE REGULATIONS GOVERNING ROLLER BEARINGS

In accordance with the order issued by the Minister of Foreign Trade on 3 April 1950, the Cebilo Central Office of Roller Bearings will supervise the use of roller bearings in all enterprises in Poland. The object is to guarantee the most efficient exploitation of roller bearings, with special attention to the application, maintenance, assembly, and warehousing of roller bearings and parts.

Specially authorized inspectors will have free access to all industrial establishments and warehouses. They will inspect the following: the premises and the methods used in assembling and dismantling bearings; the adaptation of bearings to accord with standards based on tests; procedures used on dismantled bearings and followed in storing such bearings; the methods of warehousing bearings and issuing them from warehouses; the distribution of bearings from central depots; methods of warehousing, requisitioning, and applying bearing lubricants; and all records pertaining to bearings.

Based on the results of such inspections, Cebilo will submit general or specific recommendations to the State Economic Planning Commission on the management of roller bearings.
